

Citrus Rootstock Characteristics

ROOTSTOCK	ADVANTAGES	DISADVANTAGES
African Shaddock x Trifoliolate	vigorous, arge tree? quality and production gummosis cold nematode tristeza	exocortis salinity and alkalinity? Eureka lemon incompatability
Carrizo and Troyer citranges	tristeza (moderate) gummosis cold nematode quality and production vigorous tree	exocortis salinity and alkalinity wet feet Eureka lemon incompatability
Citrumelo 4475 Swingle	quality and production gummosis cold nematode tristeza	lime-induced chlorosis salinity and alkalinity Eureka lemon incompatability exocortis
C 35 citrange	vigorous but moderate tree size quality and production gummosis cold nematode tristeza	exocortis salinity and alkalinity Eureka lemon incompatability
C. macrophylla for lemons only	quality and production gummosis salinity and alkalinity boron exocortis	nematode short-lived tree cold
Schaub rough lemon	production tree vigor lemon fruit quality	gummosis cold salinity and alkalinity nematode orange fruit quality
sour orange Brazilian sour for lemons only	quality gummosis salinity and alkalinity cold long-lived tree	tristeza nematode wet feet
sweet orange Pineapple and Utt sweet	quality and production tristeza exocortis long-lived tree	gummosis nematode wet feet salinity and alkalinity
Volkameriana	production tree vigor gumosis	cold nematode salinity and alkalinity
